## PROFESSIONAL SUMMARY

Backend Software Engineer with **3+ years of experience** building and scaling internal platform infrastructure and API verification systems at **Zoho Corporation**. Core contributor to a dependency-aware execution platform supporting 350+ engineers and processing **70K+ API** validations daily through parallel execution and automated release verification. Skilled in **Java, PostgreSQL, Docker, and CI/CD (Jenkins)** with a track record of delivering features end-to-end — from requirements gathering to production deployment — in a lean, high-impact **team of 5**.

---

## WORK EXPERIENCE

### Member of Technical Staff , Zoho Corporation

Jul 2023 - Present

- Designed and optimized a graph-based execution engine that resolves inter-test dependencies, partitions execution DAGs into parallelizable clusters, and orchestrates concurrent execution using Java ThreadPoolExecutor and CompletableFuture to maximize execution throughput.
- Scaled a dependency-aware API verification platform used by **350+ engineers**, processing **70K+ API validations daily** while reducing execution turnaround time from **24+ hours to 12-15 hours**.
- Integrated the platform with **CI/CD pipelines (Jenkins, Docker)**, automating build validation and creating a mandatory release checkpoint that improved stability and reduced release-blocking issues.
- Redesigned PostgreSQL schemas and optimized critical queries to eliminate execution bottlenecks and support highly concurrent workloads generated by hundreds of engineers.
- Spearheaded **end-to-end feature delivery**, from gathering requirements with QA and Dev teams to deployment and production reliability, ensuring smooth adoption across all stakeholders.
- Mentored peers on the in-house ORM (Mario ORM), cutting onboarding time by **~50%** and improving query consistency across the team.

### Developer Intern, Zoho Corporation

Jul 2022 - Jun 2023

- Contributed to the same API verification platform later owned as MTS. Key work included dockerizing dev/test environments, reducing new engineer setup time from **~2 hours to few minutes** and streamlining deployments. Resolved critical backend bugs to improve the framework's stability during **70K+ daily test runs**.

---

## EDUCATION

### Bachelor of Engineering - Computer Science

Sri Krishna College of Engineering and Technology

Aug 2019 - Apr 2023

CGPA: 9.04

---

## ADDITIONAL INFORMATION

- **Languages:** Java, SQL, JavaScript
- **Databases:** PostgreSQL (Advanced)
- **API Development:** RESTful APIs, Postman
- **DevOps & Infrastructure:** Docker, Jenkins, Linux
- **Version Control:** Mercurial, Git
- **Testing & Automation:** API Verification Platforms, Selenium
